About Spearmint Energy

Spearmint Energy is a leading energy company focused on developing, owning, operating, and optimizing battery energy storage systems ("BESS") to reduce grid volatility and increase system resiliency. Spearmint currently operates a 150MW/300MWh BESS project in West Texas, and has 23 projects, totaling over 15GWh of capacity, under development in 12 states across 5 U.S. regions. Headquartered in Miami, with an additional office in Minneapolis, the company employs over 70 professionals and is guided by strong values rooted in people, partnerships, and the planet.
