

Overview of TeraWatt Technology Inc.

TeraWatt aims to realize next-generation batteries that deliver high performance while also offering mass-production capability and cost competitiveness. While a key challenge in next-generation battery development is the gap between research and manufacturing, TeraWatt has assembled a globally rare team of leading engineers and established an integrated development structure in which R&D engineers and manufacturing engineers work together as a single team. This approach enables the company to advance research and manufacturing in parallel. By locating its headquarters in the United States, TeraWatt has designed its fundraising and governance frameworks on a global basis, while establishing development and production bases in Japan to leverage the country's strengths in manufacturing. In terms of target markets, the company is focused on strategically important sectors from an economic security perspective, including unmanned aerial vehicles such as drones, two- and four-wheel electric vehicles, and stationary energy storage systems.

Company name	TeraWatt Technology Inc.
Established	2020
Headquarters	California, USA
Japan Offices	Yokohama City and Yamato City, Kanagawa Prefecture; Gotemba City, Shizuoka Prefecture
CEO	Ken Ogata
Business activities	Development, manufacturing, and sales of next generation -generation lithium-ion batteries

Overview of Kyuden International Corporation

KIC leverages the technologies, expertise, and networks that the Kyuden Group has cultivated both in Japan and overseas to develop power generation, transmission, and distribution businesses across Asia and other regions worldwide.

Through continued collaboration and strengthened partnerships with both internal and external stakeholders, KIC aims to expand business opportunities while advancing initiatives that support low-carbon and decarbonized solutions tailored to the specific conditions of each country. In doing so, KIC seeks to contribute to the realization of a carbon-neutral society.

Company name	Kyuden International Corporation
Founded	1999
Headquarters	Fukuoka City, Japan
President and CEO	Takahashi Mitsuyoshi
Business activities	Overseas energy business among others
